DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment filed 05/02/2006. Claims 1-6 and 13-29 have been cancelled.

Allowable Subject Matter

2. Claims 7-12 are allowed.
3. The following is an examiner's statement of reasons for allowance. Claims 7-12 are directed to a cable used in a power-integrated network. More specifically, independent claim 7 identifies the uniquely distinct features: the cable comprises a data channel for transmitting data, a power channel for transmitting power, and a firewall energized by power received from the power channel. The closest prior art, Lehr et al. (6,643,566), discloses a cable used in a power-integrated network, the cable comprising a data channel for transmitting data, a power channel for transmitting power. Another prior art, Fackler et al. (5,729,204), discloses an intelligent cable that allows a host device to selectively access and communicate with an associated peripheral device. However, Lehr and Fackler, either alone or in combination, does not teach that the cable comprises a firewall. The prior art, taken either singly or in combination, fails to anticipate or fairly suggest

the limitations of applicant's independent claim, in such a manner that a rejection under 35 U.S.C 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
